HUSTAD COMPANIES

HISTORY & EVOLUTION

Founded in 1973 in Madison, Wisconsin, HUSTAD Companies has grown from a regional roofing contractor into a nationally licensed and bonded partner operating in 46 states. We provide comprehensive asset protection and restoration services for federal agencies, DOD contractors, healthcare, commercial, and private clients—delivering projects on time and without cost overruns. Our capabilities span roofing, environmental abatement, demolition, storm response, and capital planning, supported by AI-driven storm tracking, drone inspections, and executive-ready reporting. Trusted on federal, private, and military projects nationwide, we stand behind every project we deliver, protecting high-trust relationships and exceeding expectations for more than 50 years.

EXPERTISE

HUSTAD Companies proudly supports the missions of government and institutional partners by delivering construction services of the highest caliber. We consistently exceed expectations, contributing to some of the nation's most critical and advanced construction initiatives.

SELF-PERFORMANCE

HUSTAD Companies brings decades of expertise in commercial roofing, specializing in flat systems—including PVC, TPO, EPDM, and modified bitumen—as well as pitched roofing and highly engineered wind-vent roof assemblies. By self-performing critical work, we ensure superior quality, cost control, and schedule certainty, while also delivering trusted solutions for exterior elevations and commercial building envelopes.

Flat Roof Assemblies - Class Specialization

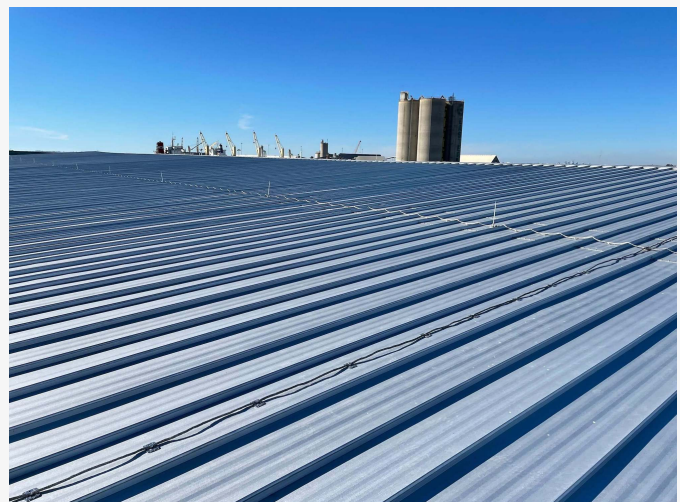

- ✓ TPO
- ✓ PVC
- ✓ EPDM
- ✓ Modified Bitumen

Engineered Systems

- ✓ Wind Vented
- ✓ Lightning Protection Systems
- ✓ Standing Seam Metal
- ✓ Heat Trace Systems

Pitched Roof Assemblies - Class Specialization

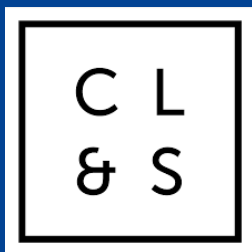

- ✓ Asphalt - Class 4 Impact Resistant Optional
- ✓ Slate and Copper - Historical Compliant Applications
- ✓ Clay and Cement Tile - HOA/Multifamily Experienced
- ✓ Stone Coated Steel

KEY FOCUS AREAS

CORPORATE STRENGTHS OVERVIEW	
STRENGTH	
Preconstruction Services & Capabilities	At HUSTAD Companies, our business development, estimating, and pre-construction teams specialize in the commercial roofing and exterior envelope sector, providing precise cost estimates, subcontractor coordination, and schedule management that ensure every project's success from the ground up. Working closely with project managers, we maintain comprehensive CPM schedules that keep stakeholders informed at every stage, while our focus on the building envelope—roofing, waterproofing, and cladding systems—drives accuracy, durability, and innovation. Leveraging cutting-edge technologies such as high-resolution drone inspections, AI-powered monitoring platforms, and advanced imaging tools, we deliver unparalleled inspection and analysis capabilities that detect early signs of deterioration, validate installation quality, and predict maintenance needs. This integration of expertise, technology, and proactive oversight positions HUSTAD as a leader in delivering high-performing, long-lasting commercial roofing and envelope solutions with complete transparency and confidence for owners and developers.
Superintendent and Quality Control Manager	At HUSTAD Companies, our superintendents play a pivotal role in leading and managing every aspect of commercial roofing and exterior envelope projects. They are directly responsible for coordinating onsite operations, ensuring quality control, and maintaining the highest standards of safety across every phase of construction. Working closely with project managers and operations leadership, HUSTAD superintendents establish and maintain detailed project schedules, oversee day-to-day coordination, and manage both in-house trade crews and subcontractors to keep complex, multi-trade projects on track. Their responsibilities extend to strict adherence to plans, specifications, and building codes, while also maintaining open communication with owners and onsite representatives to resolve discrepancies without delay. To ensure safety and efficiency, our superintendents conduct weekly site coordination and safety meetings, lead preparatory discussions, and generate comprehensive daily reports. By enforcing HUSTAD's Zero Accident Safety Program and upholding full compliance with industry and project-specific requirements, our superintendents guarantee that every roofing and exterior envelope application—whether across single structures or large-scale, multi-building developments—is delivered with precision, durability, and complete accountability.
Site Safety, OSHA - Corporate Compliance & Standards	At HUSTAD Companies, safety is the foundation of every commercial roofing and building envelope project. Our dedicated Safety Manager oversees all site operations, ensuring that every team member, subcontractor, and vendor treats safety as the top priority. Weekly toolbox talks, daily field reports, and strict OSHA and project-specific compliance keep crews aligned and risks minimized, while comprehensive documentation—including SDS sheets, AHA reports, equipment inspections, safety deficiency tracking, and accident investigations—ensures full transparency and accountability. Through weekly safety talks that identify risks and reinforce best practices, daily field reporting that tracks work performed and site conditions, and full compliance with OSHA and site-specific requirements, we maintain the highest standards across every project. With this rigorous and proactive approach, HUSTAD delivers commercial roofing solutions built on safety, trust, and performance—protecting our teams, our partners, and every project we touch.

CLIENT TESTIMONIALS

We recently commissioned Hustad to handle from start-to-finish a \$1.127MM roof replacement claim for a 256,000 sq ft. multi-family property in College Station, Texas that was damaged extensively by hail. Not only were Hustad's representatives able to negotiate a detailed and comprehensive scope of loss with our insurers—including gutters, drains, and downspouts on 25 buildings and a clubhouse—they were able to do so seamlessly and to complete the entire project quickly. In fact, once scope of loss was agreed upon, in less than four weeks our roofs and exteriors were fully restored. Suffice it to say that I have been in the business for decades and, until Hustad, had yet to encounter a roofing company that's truly the total package in terms of its ability to operate on a nationwide scale, while also offering a high-touch, boutique-style service (and simultaneously providing a free, industry-leading software package along with year-over-year capex consulting to assist with our team's management functions).

Santiago Quiroz Jr, SVP Facilities & Construction

Hustad has been an outstanding resource as we have responded to storm damage resulting from several tornadoes, hail damage, and high winds affecting over 3,000 units. Hustad delivered an aggressive schedule to replace the roof and siding repairs. Most importantly, they have delivered a great product and taken extensive care to minimize the inconvenience to our residents.

Shawn Stadler, Regional Manager

After numerous successful projects with the Hustad Companies, we are proud to call them our preferred roofing contractor. From a roof estimate to a completely brand new roofing structure, Hustad is always more than happy to help—and they are always timely and extremely professional.

Aaron Moser, President

Hustad managed from start-to-finish multiple capex and insurance claim roof replacement projects for properties located in Alabama, Arkansas, Idaho, Texas, and Washington. Not only were Hustad's representatives able to negotiate a detailed and comprehensive scope of loss with our insurers, they were also able to do so seamlessly and complete all projects quickly. In the case of the Arkansas property, our claim had previously been denied by insurance. After a year of working with the insurance company, our Hustad representative was able to convert the claim into one that resulted in full roof replacements throughout 75% of the property. I firmly recommend Hustad Companies and have the utmost confidence in its principals.

Stacey Lecocke, Executive Vice President

Our community of nearly 2,000 homes was deeply affected by two tornadoes and a major hailstorm—and Hustad has been an outstanding resource as we have responded to the resulting damage. Hustad has been most cooperative in dealing with complex insurance negotiations, delivering on an aggressive schedule to replace roofs and complete additional exterior repairs.

Dominic Vaccaro, President, Real Estate

Hustad has done excellent work for us, from pre-project planning to post-project follow-up. They have stepped up and helped us with emergency work during bad weather—even overnight on one occasion.

Joe Cordle, Facilities Supervisor Central Region

We use Hustad in as many projects as we can for our multi-family and industrial investment consultant division. We have used countless restoration contractors across the world, and in my tenure, we have never come across an outfit that produces this quality of work in such a timely manner.

Clarence "Trey" Erwin, Senior Associate, Industrial Division

Master Service Agreement (MSA) Overview

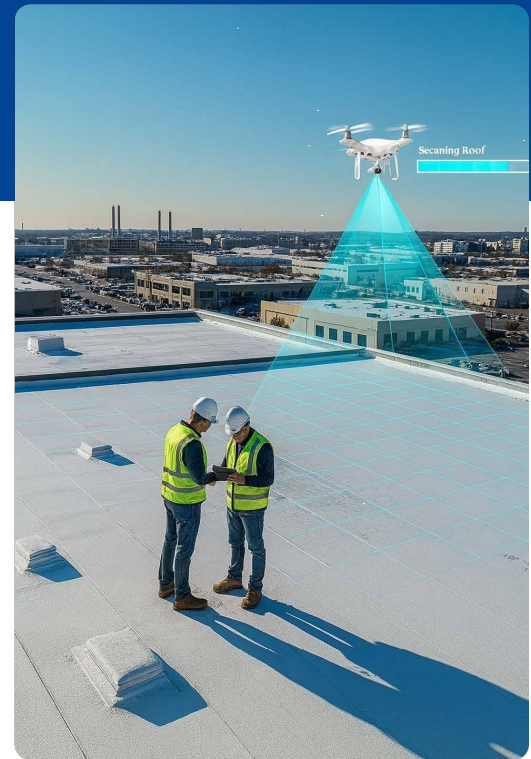

What is an MSA?

A Master Service Agreement (MSA) is a strategic partnership framework between HUSTAD Companies and property owners/managers. It sets clear expectations for inspections, reporting, communication, and capital planning. Unlike project-by-project bidding, an MSA creates long-term alignment, transparency, and cost predictability across entire portfolios.

Why This Matters

An MSA is not just about roofing. It's about protecting Net Operating Income (NOI), ensuring compliance, preventing emergency losses, and supporting long-term asset strategy.

HUSTAD Companies — 50+ years of trusted performance, 2,000+ properties under MSA portfolios, and \$26M+ single-project capabilities.

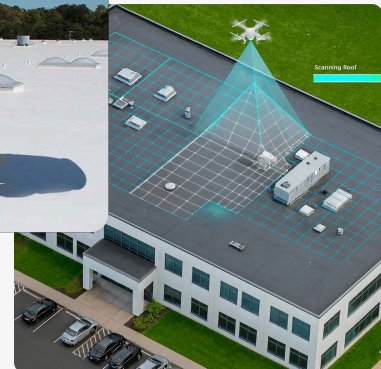

Benefits of an MSA Partnership

- No-Cost Annual Inspections – Comprehensive 50–300 page reports with annotated drone photos, condition grades, and executive-ready summaries.
- Proactive Risk Prevention – Identifies risks before they become costly failures, supporting preventative maintenance and compliance requirements.
- CapEx Forecasting & Planning – 3–5 year repair and replacement forecasts, budget consulting, and executive-ready summaries.
- Storm Event Response – AI-driven storm tracking with branded SMS/email alerts and inspection mobilization within 24–72 hours.
- Claim Coordination – Guidance through insurance claims or below-deductible repair proposals.
- Portfolio Transparency – Dashboards for visibility into inspections, repairs, warranties, and storm history.
- National Reach, Local Execution – Licensed and bonded in 46 states, with regional service teams that mobilize quickly.

Markets We Serve Under MSA
